

This product meets the Green Seal™ environmental standard for industrial and institutional cleaners based on its reduced human and aquatic toxicity and reduced smog production potential.

e.logical products including **GO₂ Oxygenated Cleaner** and other green equipment & supplies are available through:

GREEN CLEANING SYSTEM

GO₂ OXYGENATED MULTI-PURPOSE CLEANER - SPOTTER - DEODORIZER Concentrate

The Go2 Dispenser automatically dilutes product into both trigger spray bottles and buckets or cleaning equipment. Up to 4 different dilutions are pre-set for effective cleaning across an entire range of cleaning tasks including:

- Floors
- Restores Grout
- Carpet Cleaning & Spotting
- Bathroom Fixtures, Walls & Bowls
- Windows / Mirrors
- Spray & Wipe Cleaning / Degreasing
- Deodorizes as it cleans.
- Safe on Hard Surfaces and Fabric

Customer Benefits:

- Easy To Use (1 Product vs. 4 or 5)
 - Reduced Inventory
- Color Coded, Bi-Lingual Labels, Charts & Training Materials
- Certified by GREEN SEAL (GS-37) & Carpet & Rug Institute (CRI)

The e.logical GO₂ cleaning system harnesses the power of hydrogen peroxide in an environmentally green certified cleaning formulation. Fortified with natural citrus solvents and special biodegradable surfactants GO₂ offers reduced toxicity. GO₂ can be diluted and used for multiple cleaning tasks eliminating the need for extra products.

The GO₂ system comes with accessories that include:

- Secondary Labels (color & number coded)
- Laminated Wall chart (color & number coded)
- Laminated MSDS & Technical Data Sheet

GO₂ Oxygenated Cleaner is:

- Biodegradable
- Non-corrosive
- Non-combustible
- Contains no carcinogens or reproductive toxins
- Passes tests for skin and eye sensitivity and corrosivity
- Concentrated formulation with reduced packaging
- Recyclable packaging

GO₂ Oxygenated Cleaner and other e.logical cleaning solutions meet the criteria outlined in Presidential Executive Order 13101 to "Promote Sustainable Environmental Stewardship"

Why Green Cleaning?

The EPA estimates that the average person spends 90% of their time indoors and has identified the "built environment" as one of the top 5 occupational health risks. Green cleaning practices will improve the "built environment" leading to a cleaner, greener, healthier and more productive environment.

Implementation of a Green Cleaning Program including the use of GO₂ will:

- Improve the IAQ of building
- Reduce risks and potential hazards associated with harmful corrosive chemicals
- Improve the health and safety of building staff, occupants and visitors
- Meet and exceed State and Federal VOC levels
- Increase building productivity
- Reduce building waste
- Extend life cycle of equipment / fixtures and surfaces
- Lower building operational costs

GO₂ ...logical choice for greener, cleaner, healthier buildings
