

# Solid Metal Safe Detergent

## Warewashing Detergent

Nonchlorinated solid detergent for use in automatic dishwashing and dispenser systems. Solid convenience and performance. Safely and effectively loosens, lifts, and removes heavy soils from metals such as aluminum, pots, pans, trays, dishes, glassware, plastic, utensils, pewter, and other soft metals. Use in automatic dispensing systems; no mixing, spilling or mess. Low foam; works in all water temperatures and conditions. Spot-free rinsing. Ideal for use in conveyor, flight type, and single rack dish machines. Excellent performance and results in bakery pan washers and other low foam cleaning operations. Solid packaging uses less space, reduces waste, and is more convenient than liquids and powders.

### DIRECTIONS

Read the entire label and SDS for proper use, handling and storage before using this product.

1. Remove jar cover.
2. Place upside down into dispenser.
3. Set dispenser for proper dilution using test kit and pH measurements based upon water conditions and soil load.
4. Replace when empty.

For other applications, consult your chemical sales / technical representative for proper use and dilution recommendations.
