

Powdered Oxygenated Bleach

All Fabric Bleach

Powdered Oxygenated Bleach is an all-fabric bleaching agent for use in institutional and on-premise laundries (OPL). Powdered Oxygenated Bleach is safer to use than traditional chlorine bleach and is effective on a wider variety of soils and stains. Use as part of a multi-component system or use alone as a presoak to remove stubborn stains. Use with all washable linens and water conditions.

DIRECTIONS

Read the entire label and SDS for proper use, handling and storage before using this product.

May be used on delicate and sensitive fabrics. Test nylon, silk and wool for washability in water. Always separate light and dark colored items.

Special laundry instructions:

1. Test fabrics for colorfastness by dissolving 1 tbsp. of bleach in a cup of hot water.
2. Soak linen in solution for 1 minute.
3. Rinse.
4. If color bleeds, do not use bleaching agents.

Pre-soaking: Dissolve 1 tbsp. of bleach in 1 gallon of water.

Cold water wash:

1. Use cold water when pre-soaking or washing linens/fabrics with stains such as blood, milk, egg or gravy.
2. Predissolve bleach in warm water and add to wash or presoak container.
3. Wash nylon, wool and silk in cold water.

Top loading machines: Add ½ cup of Powdered Oxygenated Bleach during the bleach cycle.

Commercial machines: Add ½-1 cup of Powdered Oxygenated Bleach per 50 lbs. of dry laundry.

FAST FACTS
