

MARVALOSA

MicroAir 3000 Metered Air Freshener

Frequently Asked Questions

Q: What dispensers will the Marvalosa MicroAir 3000 cartridge fit?

A: The 2.6 oz. can will fit most dispensers that have a clamp or grip to hold the top of the aerosol can. These include dispensers designed for micro size cans and some dispensers with grips designed for larger 7 oz. cans.

Q: How long will the can last?

A: The can contains 3000 pre-measured sprays. Depending on the settings of the dispenser, each can will last 30, 45 or 60 days. Turn on the dispenser's beep function to be notified when the can is empty.

Q: How high should the dispenser be mounted?

A: Dispensers should be mounted approximately 6' - 6½' high. Do not mount dispenser near HVAC vents.

Q: How big of an area will a spray be effective?

A: Each spray will effectively treat approximately 6,000 cu ft (typical size of a 4 fixture bathroom).

Q: How does deodorizing capacity of the 2.6 oz. MicroAir can size compare with traditional 7 oz. cans?

A: It has the same deodorizing capacity using micro-technology that allows the atomized deodorizer molecules to expand as they hit the atmosphere.

Q: What is the warranty on the dispenser?

A: 10 year warranty against manufacturing defects.

Q: Why does the dispenser open from the bottom and lift up?

A: It is easier to replace cans, batteries and also program the dispenser.

Q: How does someone know when the battery needs to be replaced?

A: The dispenser has a battery refill symbol showing the level of battery strength remaining. Turn on the dispenser's beep function to be notified when the battery needs replacement.
