

# HEALTH CARE PRODUCT CATALOG

# TABLE OF CONTENTS

## HEALTH & COMFORT

Patients being treated in health care facilities require surroundings that are clean, healthy and comfortable. Clean, welcoming environments contribute to their wellness as well as peace of mind for friends and family. A cleaner, healthier environment is also a safer one. Healthy living and working spaces produce higher patient, visitor and staff satisfaction, sustaining the long-term health of your bottom line.

## INFECTION CONTROL

Floors, surfaces and restrooms that look and smell clean are important. Even more important, however, is that environments are disinfected properly to reduce the risk of cross contamination. It is crucial to control viruses and bacteria that spread quickly in close quarters, as they harmful for patients' vulnerable immune systems.
